

AQUARECYCLE[®]

Clean water. Clean profit.SM

CBR

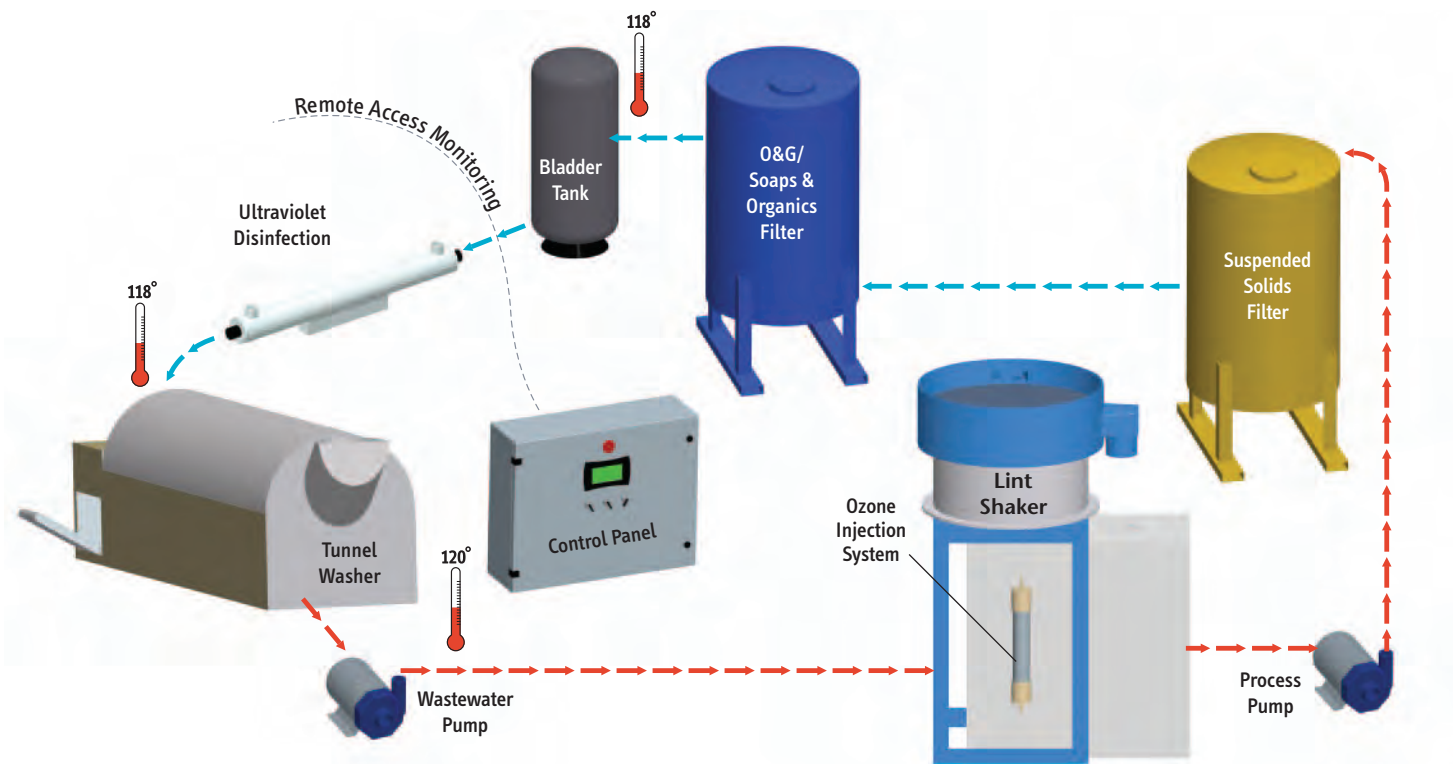

- This is our original patented AquaRecycle[®] process, designed to maximize water and energy savings. It has been upgraded to our newest technology and automation
- CBR is designed for Tunnel Operations – equipment is compact and easy to install
- Documented and Guaranteed Water and Energy Savings – up to 70% reduction in water usage and substantial energy savings
- Designed to run independently to a CBW, through a heat exchanger system or directly to final water supply tanks and pumps
- Fully upgradeable and expandable – as your operation grows, so does the CBR

CBR

Simple Operation

- Wastewater from the washers is pumped to our Lint Vibration Removal System for filtration of all large solids in the process water.
- Our process pump sends the filtered water through our pressure filters, removing the suspended solids, oil and grease, soaps and organics, and other contaminants. The final process sends the recycled water to directly back to the Tunnel Washer or to a Tempered Water Tank and/or Hot Water Tank for reuse.
- UV and Ozone Disinfection System provide a dual assault on bacteria and viruses before the recycled water goes back into the washing process. The AquaRecycle® AquaSmart™ system monitors water quality and chemistry to insure only the best quality water comes back to the laundry operation.
