

AQUARECYCLE®
Clean water. Clean profit.™

PREMIUM PLUS System

PREMIUM PLUS

WITH *PURIFY*

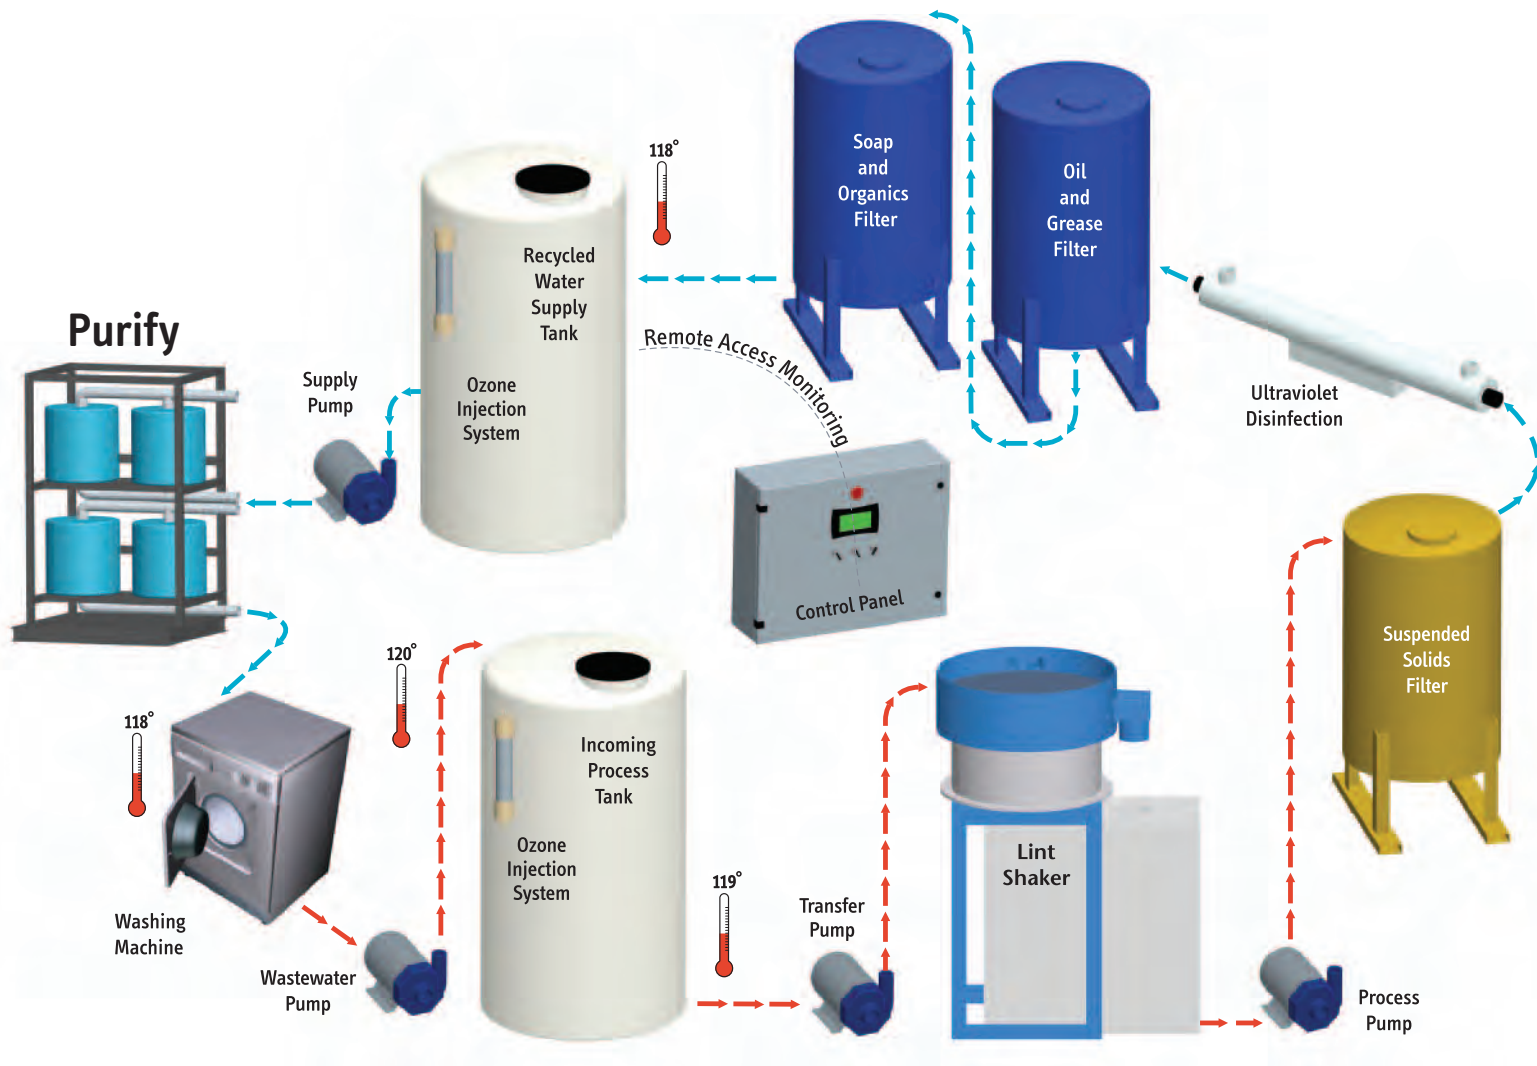

- This is our original Patented AquaRecycle® process, designed to maximize water and energy savings. PLUS means its been upgraded to our newest technology and automation
- Documented and Guaranteed Water and Energy Savings – Up to 80% reduction in water usage and 50% energy savings
- Targets all kinds of commercial laundry operations – Hospitality, Healthcare, Correctional, Military and Mixed Use Plants
- PURIFY is an electrostatically charged process which expertly removes minute particles and ions from recycled water
- PURIFY includes a clog free design which, unlike membrane technology, is an automatic, maintenance free process
- PURIFY is the only non-RO process that removes the salts and minerals (mainly from chemicals) from recycled water preventing TDS buildup

PREMIUM PLUS WITH PURIFY

SIMPLE OPERATION

- Wastewater from the washers are pumped to a wastewater tank (IPT) and then to our lint removal vibration system for removal of all large solids in the process water
- A centrifugal pump sends the filtered water through our pressure filters, removing the suspended solids, oil and grease, soaps, and organics, and other contaminants and sending the recycled water to a recycled water tank. Finally our supply pump sends high volume flow of recycled water to the washing machines as both hot and cold water supply to the washers
- The PURIFY system continuously pumps recycled water through its electrostatic process, removing remaining salts and minerals and adding the PURIFIED water back into the Recycled Water Tank
- UV and Ozone Disinfection System provide a dual assault on bacteria and viruses before the recycled water goes back into the washing process. The AquaRecycle® AquaSmart™ system monitors water quality and chemistry to insure only the best quality water comes back to the laundry operation
