GOVERNMENTAL

AquaRecycle® announces its award winning, patented recycle system has now been combined with Reverse Osmosis to “polish” and “purify” recycled water to PERFECTION. Reverse Osmosis is the only technology that effectively removes ALL TDS in recycled water and the ARROW system is the only recycle system in the industry to use REVERSE OSMOSIS for recycled water. And the ARROW system provides recycled water at 70% recovery rates while still capturing all the heat in the wastewater for combined water, sewer and energy savings that are the best in the industry. So, when looking for the best quality water combining RO with AquaRecycle® is **PERFECTION.**
