Introducing the first high efficiency dryer heat recovery system in the industry, ThermalRecycle™. With documented up to 50% energy reduction and 30% reductions in dryer times, this revolutionary Heat Exchange technology can significantly reduce energy costs while drastically improving dryer efficiencies with faster drying times. Our patent pending heat wheel technology and "air-blast" cleaning system keeps exhaust moisture and lint away from the re-heated incoming air for perfect quality and most efficient drying. Welcome to the next generation of energy savings – ThermalRecycle.

THERMALRECYCLE
