

AQUATRAKX™

AQUARECYCLE®
Clean water. Clean profit.™

AquaTrakx™ by AquaRecycle® is the most innovative Water Monitoring System in the world today.

Perfect for Hotels, Hospitals, Correctional or any facility with multiple water distribution locations that need both quantity and quality measurements 24/7.

AquaTrakx™ is a completely wireless, non-invasive water tracking and testing system that meters all water lines desired within a property or facility. The system uses set parameters to monitor daily water flow and indicate changes in water usage or quality.

- As an ESG provider, AquaTrakx™ can systematically identify, assess, and mitigate any risk associated with water distribution in a property
- Wireless and external, so AquaTrakx™ can be installed anytime with no interruptions in operations
- Daily monitoring for immediate coverage is available as well as bumper to bumper parts replacement and monthly usage reports

Call today at **1.866.272.9253** for a limited time introductory price that includes six location meters and probes tracking usage anywhere in or out of the operation. Includes installation and daily tracking with automated email alerts as well as phone app for remote usage.

AQUATRAKX™

Water Track. Water Check.

Catch **water leaks** before they become expensive disasters!
