

OnO™

AQUARECYCLE®
Clean water. Clean profit.™

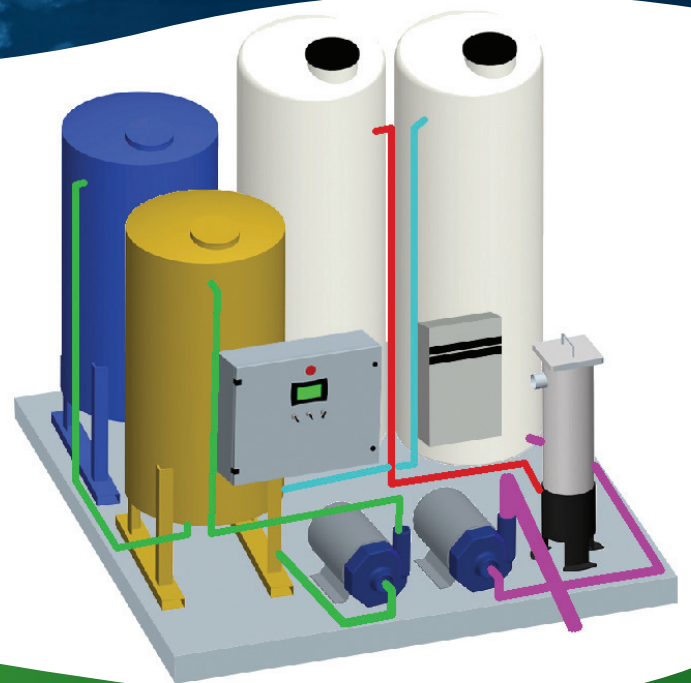

Open and Operate

Oh yes! **Open and Operate (OnO AR)** is our skid-mounted, all-in-one recycle system designed to operate in virtually all washing environments.

This PURPLE PIPE technology is designed for recycling washing rinse water and can reduce water usage by up to 50%. This reuse water is used as hot or warm water in the initial and wash cycles as a Third Pipe option. For companies looking for an inexpensive option to meet sustainability goals, OnO gives an easy way to install and operate in an industrial, coin/self-service, or small hospitality property.

**AquaRecycle's All-in-One
OnO™ Recycling System
meets ESG and
sustainability goals.**
